

A SMARTER WAY TO A STRONGER LIFE

SPORT, RE-ENGINEERED BY INTELLIGENCE.

One machine that thinks. Robotic digital weight, an AI personal trainer, and integrated force plates — replacing the weight room, the cable rack, and the personal trainer with a single, beautifully engineered platform.

For a century, getting stronger meant moving heavier steel by hand.

We rebuilt the gym around **data, robotics and AI** — so every rep is measured, guided and made safer.

REAL-TIME · FORCE PRODUCTION

VELOCITY · LOAD · BALANCE · ROM

Iron is dumb. A barbell cannot tell you if your left side is compensating, when fatigue is about to break your form, or how much faster you would progress with a different load. OxeFit can. Dual robotic motors deliver up to 180 kg of digital resistance that adapts mid-rep, while sensors read force, velocity and balance hundreds of times a second.

Intelligence is the upgrade. Force plates measure asymmetry. OxeAI builds and adjusts your program. OxeLead turns every session into analytics a coach can act on. The result is the rare machine that gets **smarter the more you use it** — and turns a room full of equipment into one quiet, elegant platform.

1

MACHINE · WHOLE GYM

Four technologies the rest of the gym doesn't have.

03

01 · Robotics

Robotic Digital Weight

Motor-driven resistance loads and unloads at the push of a button — no plates, no collars. It adapts within the rep across concentric and eccentric phases, enabling overload, chains and assisted modes that free weights physically cannot reproduce.

02 · Artificial Intelligence

OxeAI Personal Trainer

Your AI trainer assesses, scores and programs for every level. It reads your performance, predicts fatigue and responds with personalized, real-time programming — coaching that adapts to the athlete instead of the other way around.

03 · Sensing

Force-Plate Bio-Feedback

Integrated force plates measure force, frequency and asymmetry with exceptional precision — revealing how your body moves through space, where you compensate, and how balance and control improve over time.

04 · Data

OxeLead Analytics

Every session becomes a record: power, velocity, load, force and range of motion, tracked historically through the OxeLead trainer portal. Assessments and progress that members and coaches can see, compare and act on.

Two platforms. One intelligence.

CONNECTED · PERFORMANCE

XS1

HOME · HOSPITALITY · BOUTIQUE

The all-in-one smart gym. Strength, six cardio sports, Pilates and gaming on a folding deck with a 32" touchscreen — designed for premium residences, hotels and studios.

Everything, on one folding deck.

06

OxeTrain Library

280+ guided exercises and 3,000+ streaming classes and programs across strength, cardio and Pilates.

Adaptive Resistance

Up to 130 kg from the deck and 65 kg from the rack, with Overload, Chains, Burnout, Adaptive, VBT and Perturbation modes.

OxeReform Digital Pilates

A full reformer-style Pilates experience, plus OxePlay gaming and X2 premium content for nutrition, wellness and longevity.

Balance Bio-Feedback

Integrated force plates measure force and asymmetry in real time, so balance and control are trained, not guessed.

Integrated Assistant

Virtual spotter, stall detection and movement monitoring keep every session safe without a second person in the room.

OxeLead Portal

Historical analytics and assessments — power, velocity, load, force and range of motion — for the member and the coach.

COMMERCIAL · ELITE · 02

XP1 PRO

THE WORLD'S MOST ADVANCED SMARTGYM

Commercial-grade strength, built for the serious. Up to 180 kg of robotic digital weight, a 43" touchscreen, dual force plates and real-time video with a 360° avatar — engineered for elite athletes, teams, performance facilities and clinical rehabilitation.

BARBELL

CABLE TOWERS

PERTURBATION

"Built from the ground up for top-tier athletes — the most capable system tested for collecting and acting on training data."

— T3, OXEFIT XP1 REVIEW

A weight room in one frame.

08

Robotic Digital Weight

Up to 400 lb / 180 kg of tension delivered robotically — variable, adaptive resistance with no manual plate changes.

Video Capture & 360° Avatar

Real-time video capture and a 360-degree avatar for form analysis, review and remote coaching at the elite level.

Dual Force Plates

24" force plates measure force, frequency and asymmetry, powering jump, balance and strength assessments.

Advanced Modes

Overload, Chains / Inverted, Burnout, Adaptive, Tempo Train, VBT, Perturbation and OxeWheel — the full performance toolkit.

Patent-Pending Rack

Single-handed vertical bar positioning and a pivoting bench that stows away — fast transitions, ~80% less floor space than a rack.

Safety & Therapist Control

Virtual assist spotter, stall detection and unsafe-movement prevention, with controls suited to clinical and return-to-play work.

CAPABILITIES & SPECIFICATION

08

XS1 or XP1.

Both run the same OxeFit intelligence — OxeAI, force plates, adaptive modes and OxeLead analytics. The difference is scale, capture and the demands of the room they live in.

SPECIFICATION	XS1 · PEAK+	XP1 · PRO
Best suited to	Residences, hotels, boutique studios	Elite sport, clinics, commercial facilities
Robotic resistance	130 kg deck · 65 kg rack	Up to 180 kg robotic tension
Display	32" touchscreen	43" touchscreen
Force plates	Integrated balance bio-feedback	Dual 24" — force, frequency, asymmetry
Video & avatar	AI on-board tracking	Real-time video + 360° avatar capture
Disciplines	Strength · 6 cardio sports · Pilates · gaming	Strength & performance focus · Olympic lifting
Footprint	Folding deck — folds to 55 cm deep	Fixed commercial frame, ~80% less than a rack
Shared intelligence	OxeAI · adaptive modes · OxeLead	OxeAI · adaptive modes · OxeLead

Choose XS1

When versatility, design and space matter most — a complete training experience for the home, the suite or the studio floor.

Choose XP1

When the work is heavy and measured — performance teams, rehabilitation and facilities that demand commercial capability and capture.

WARRANTY & INSTALLATION · GCC

OxeAI is **the only platform that holistically tracks cardio, strength and balance** — using dual motors and force plates to read your body, predict fatigue, and program the next session before you ask.

Most trackers count reps. OxeAI understands performance: range of motion, balance, strength and fatigue, scored and turned into a personalized path. Its unique sensor stream — data other systems simply do not collect — is what trains the neural networks behind every recommendation. The more it sees, the sharper it gets.

ADAPTIVE TRAINING MODES · RESULTS IN LESS TIME

• **Overload**

Eccentric / concentric overload to your specific range of motion for faster, safer gains.

• **Chains / Inverted**

Resistance that builds through the lift, recreating chains without the steel.

• **Adaptive**

Finds the optimal weight automatically as performance and progress change.

• **VBT**

Velocity-based training — load governed by bar speed, not guesswork.

• **Perturbation**

Neuro-reactive resistance that increases antagonist activation and control.

• **Assess & Score**

Range of motion, jump, balance, strength and endurance — measured and tracked.

Built for every arena.

11

Replace a room of equipment — and the overhead that comes with it.

WHAT THE XS1 & XP1 STAND IN FOR

Squat rack

Bench press

Cable towers

Cardio machines

Pilates reformer

Personal trainer

»

ONE PLATFORM

~80%

Less Floor Space

A traditional rack and accessories can demand up to 300 sq ft; the XP1 fits most rooms and the XS1 folds away.

New

Revenue Streams

Monetize baseline assessments, post-op, return-to-play and work-conditioning programs — and reinforce membership with visible data.

Retention & Results

Advanced modes deliver better outcomes in less time; gaming and challenges drive engagement, adherence and stickiness.

This is the machine that has replaced personal trainers, Peloton bikes and full cable-rack setups for high performers, leading hotels and premium residential developments across the United States — now available across the GCC through CoreV.

EXPERIENCE OXEFIT

The most serious decisions start with a *real experience.*

See the XS1 and XP1 in person and train with a certified OxeFit trainer. Now showing at our showrooms in Dubai and Abu Dhabi — by appointment.

» **Two showrooms** — Dubai & Abu Dhabi

» **Guided** by a certified OxeFit trainer

» **Hands-on** with both XS1 & XP1

» **By appointment** — book ahead
